

GLOBAL ENGINEERING CONGRESS

Turning knowledge into action

22-26 October 2018

Westminster, London, UK

A global
discussion on
sustainability led
by:

WFEO

Hosted by:

ice
Institution of Civil Engineers

In association with:

Supported by:

Time for global action

“Be a global citizen. Act with passion and compassion. Help us make this world safer and more sustainable today and for the generations that will follow us. That is our moral responsibility.”

Former UN Secretary-General, Ban-Ki Moon

Global challenges need new solutions

Over five days in October 2018, the global engineering community is coming together in London to turn their insights and knowledge into action, seeking sustainable solutions for a growing population.

Led by the World Federation of Engineering Organisations (WFEO) and hosted by the Institution of Civil Engineers (ICE), the first Global Engineering Congress will bring the entire engineering community together to focus on delivering sustainable change through engineering.

Become part of the solution

A limited number of partnership opportunities are available to position organisations at the heart of the global sustainability movement and support the congress.

Partnerships extend to our 3-year knowledge sharing campaigns, consisting of thought leadership discussions and content, extensive branding opportunities and networking events.

Global Innovators

from £50,000

- 4 x Chair/Speaker GEC conference programme sessions
- Membership of the pre-event Campaign Advisory Board
- Joint branding on GEC marketing, publicity material and during event
- 10 person table at all 3 gala dinners
- 4 pre-arranged one-to-one meetings
- Exclusive 40-minute briefing for 40 invited experts
- 10 points to spend on bolt-on options of your choice

Sustainable Specialists

from £25,000 - £50,000

- Joint branding on GEC marketing, publicity material and during event
- 2 invitations to all 3 gala dinners
- 5 points to spend on bolt-on options of your choice

Bolt-on options could include:

- VIP lunchtime event in the prestigious Presidents Dining Room at ICE HQ in London (3 points)
- Exclusive post-event evening drinks reception during congress (2 points)
- Delegate lanyard sponsorship (4 points)
- Evening debate for 150 guests (2 points)
- VIP Lounge Sponsorship (2 points)
- Hackathon Sponsorship (Bespoke)

**SUSTAINABLE
DEVELOPMENT
GOALS**

5 days of engagement and interaction

The Global Engineering Congress is an ambitious effort to unite the global engineering community, to agree and mobilise a response to five of the United Nations Sustainable Development Goals, identified as key areas where engineering can lead:

**6 CLEAN WATER
AND SANITATION**

**7 AFFORDABLE AND
CLEAN ENERGY**

**9 INDUSTRY, INNOVATION
AND INFRASTRUCTURE**

**11 SUSTAINABLE CITIES
AND COMMUNITIES**

**13 CLIMATE
ACTION**

Cities and communities must be able to withstand the pressures of climate change and rising populations, whilst finding practical ways to meet budgetary and collaborative challenges. This requires a coordinated approach across sectors – especially water, energy and transport.

Highlights of the Congress include:

Full **5** day conference programme with **90** hours of content

100+ global speakers **1000+** global delegates

150+ countries represented **20+** global engineering institutions

Roundtable discussions and workshop programme

Exclusive black tie and gala dinners

Exhibition, networking and governmental engagement programme

Post congress report including Infrastructure Sustainability Toolkit

About

WFEO is an international, non-governmental organisation founded by UNESCO; it brings together national engineering organisations from over 90 nations and represents some 20 million engineers from around the world.

ICE is the oldest professional engineering body in the world, represents 92,000 engineers across the globe and its headquarters in Westminster, London is considered the global home of civil engineering.

2018 is the 50th anniversary of WFEO, the 200th anniversary of ICE and the UK Year of Engineering. It is a pivotal moment and an unprecedented occasion for the global engineering community to come together to agree a path forward to deal with the SDG challenges and to safeguard the future.
