

Impact Attenuator Testing Judges

Volunteers are required to assess Impact Attenuator Reports prior to the competition. Full guidance will be given on assessment methods. Assessing the documents requires a basic knowledge of solid mechanics and materials testing.

In addition, we need to have at least two Impact Attenuator judges available during Scrutineering at the competition to ensure that cars are presented with the impact attenuator as documented in the report, and to inspect test samples.

Please get in touch if you would like to be considered for this role.
