# **BUILDING INFORMATION MODELLING (BIM) FOR MANUFACTURING. WHAT DOES BIM MEAN FOR YOU?**

**All public sector construction projects will have to comply with BIM (level 2) by 2016.**

- Are you aware of level 2 requirements and are you on track to meet them?
- Are your products BIM compliant and do you understand the impact of BIM on IPR?
- Do you have software solutions in place to satisfy the design requirements of BIM?

Building Information Modelling (BIM) has been hailed as the future of construction. A single repository of information that will aid smooth build and asset maintenance, reduce costs and waste, and support strong asset management strategy.

Attending this lecture will give you the opportunity to break down the myths surrounding BIM and hear how manufacturing can benefit from BIM in both the long and short term. The lecture will be followed by a short reception with complimentary refreshments.

## **WHY ATTEND?**

- **Discover** what BIM (level 2) requirements mean for you
- **Understand** the procurement and legal issues involved
- **Hear** about successful implementations from those that have done it
- **Ensure** you are fully aware of the required design criteria and available solutions
- **Debate** approaches, common challenges and solutions with peers and colleagues
