BEYOND CONVENTIONAL POWERTRAIN
SVT 2015
16-17 June 2015, University of Warwick

AS POWERTRAIN TECHNOLOGIES AND FUEL SOURCES DIVERSIFY, MEASURES OF VEHICLE EMISSIONS TAKEN SOLELY FROM THE TAILPIPE WILL NOT ACCOUNT FOR CO₂ EMISSIONS AND WIDER ENVIRONMENTAL IMPACTS.

Sustainable Vehicle Technologies (SVT) 2015 will be split over two days, looking first at recent developments in powertrain technology and the modelling tools to investigate them, before moving on to vehicle efficiency measures outside of the powertrain.

In both instances, the presentations will cover both light and heavy duty vehicles and address ICE, hybrid, electric and fuel cell solutions.

This conference will build on themes established at the 2009 Low Carbon Vehicle Conference and SVT 2012, considering the developments in vehicle technology that are shaping the latest propulsion systems.

BENEFITS OF ATTENDANCE:
• Understand the latest weight reduction technology
• Explore alternative propulsion systems
• Learn more about lifetime CO₂ analysis
• Hear the latest regulatory developments and how they will affect you
• Network with leading figures in vehicle technology

SPONSORSHIP & EXHIBITION OPPORTUNITIES
GET INVOLVED
Attending this event as either an exhibitor or sponsor will give you the opportunity to display your solutions, services and products to the right people at the right time.

This is an excellent way to enhance your company profile and communicate effectively to your target audience.

BENEFITS OF SPONSORING
• Showcase new products
• Raise awareness of your operation
• Improve perception of your brand
• Influence other organisations’ spending plans

For more information please call +44 (0)20 7973 1309 or email sponsorship@imeche.org

Find out more about our speakers at [www.imeche.org/events/C6188](http://www.imeche.org/events/C6188)

- This programme is subject to change.
- The Institution is not responsible for the views or opinions expressed by individual speakers.

---

### Organising committee:

- Jon Beasley, APC
- Chris Brace, University of Bath
- Robert Evans, Cenex
- Robert Genway-Hayden, GKN Driveline
- Jon Horsley, TSB
- Mike Richardson, Jaguar Land Rover
- David Greenwood, University of Warwick
- Matthias Wellers, AVL
- Nick Carpenter, Delta Motorsport
- Chris Wheelans, Jaguar Land Rover
MICHAEL ABBOTT
ENGD CANDIDATE, WMG, UNIVERSITY OF WARWICK
Michael Abbott became an EngD student at WMG after completing an MPhys at Warwick University in 2014. His research interests focus on new technologies in the automotive sector, particularly those that are helping progress electrification and hybridisation. He is helping develop WMG’s wireless charging capability, a key technology that could overcome the current issues surrounding the uptake of electric vehicles.

MIKE BASSETT
HEAD OF HYBRID GROUP, MAHLE POWERTRAIN
Mike Bassett graduated from Bristol University in 1993, and studied for a PhD at the University of Manchester Institute of Science and Technology (UMIST), focusing on the 1D modelling of engines. Mike joined Lotus Engineering in 2000, where he worked in the software development department. He moved to MAHLE Powertrain in 2007 and has been the Head of the Hybrid Group since 2010.

DR RICHARD BURKE
LECTURER, UNIVERSITY OF BATH
Richard Burke received a PhD from the University of Bath in 2011 and has worked as a researcher on powertrain systems since then. Richard’s research interests involve the transient performance of powertrain systems and notably understanding, modelling and controlling thermal effects. His projects include diesel engine thermal management, turbocharger and electrical machine heat transfer analysis and powertrain control effects.

DR RALPH CLAGUE
HEAD OF MOTIVE SYSTEMS & ARCHITECTURE, INTELLIGENT ENERGY
Ralph Clague spent the first half of his career in the design and analysis of internal combustion engines, before starting research at Imperial College London into fuel cell degradation and failure modes in 2005. After gaining his PhD he returned to the automotive sector to design future vehicle powertrains based on fuel cells, battery super-capacitors and electric machines at McLaren Automotive and Gordon Murray Design.

LIONEL CURTIS
TECHNICAL DIRECTOR, CARTWRIGHT GROUP
Lionel Curtis started his career as an apprentice toolmaker prior to completing a degree in Automotive Engineering. For the last 25 years he has been involved with various commercial vehicles including buses, trucks and trailers. Having spent several years in the UK trailer industry, he is now Technical Director for one of the largest trailer and truck bodywork manufacturers in the UK.

DR ANDREW DEAKIN
CHIEF DEVELOPMENT ENGINEER, TOROTRAK GROUP
Andrew Deakin joined Flybrid Automotive in 2012 and has been responsible for developing mechanical hybrid systems that use flywheels to store and release kinetic energy to and from the vehicle. When Torotrak Group acquired Flybrid Automotive in early 2014, Andrew became Chief Development Engineer for the group, and took on responsibility for its low-carbon supercharging and transmission technology developments.

DR SIMON EDWARDS
GLOBAL DIRECTOR, TECHNOLOGY, RICARDO
Simon Edwards worked for Leyland DAF Trucks. He was employed in the Advanced Technology Department, undertaking vehicle aerodynamics and engine friction reduction activities. From 1993 to 2006 he worked for Ricardo, on engine development and research projects, firstly in the UK and latterly, after a UK Royal Academy of Engineering fellowship with DaimlerChrysler, in Stuttgart, Germany. In July 2012 Simon rejoined Ricardo and is currently Global Director of Technology, responsible for the research and collaboration portfolio of the company.

ALED GRAVELLE
ENGINEER SPECIALIST, JAGUAR LAND ROVER
Aled Gravelle works for Jaguar Land Rover in the STRIVE vehicle efficiency team within research. His main responsibility is to generate and develop 1D simulation models for JLR conventional, hybrid and electric vehicles that aim to assess the effect of novel research ideas on vehicle efficiency and fuel economy. Prior to this, Aled worked at Delphi Diesel Systems as a test engineer for common rail diesel fuel pumps.

CHRIS GURNEY
SENIOR RESEARCH ENGINEER, PLATFORM ARCHITECTURE & SUB-SYSTEMS ENGINEERING, INTELLIGENT ENERGY
Chris Gurney graduated from the University of Birmingham in 2009 with a PhD in Applied Mathematics. He joined Intelligent Energy in 2011 as a research engineer examining aspects of water separation, thermal management and system modelling. Chris is now responsible for the simulation module and thermal module work packages, overseeing developments in steady state and transient system modelling, predicting future system design architectures and developing methods of heat rejection in air-cooled and evaporatively cooled fuel cell technologies.

DR CHARLES JONES
TECHNICAL SPECIALIST, ELECTRONICS & CONTROLS, AVL POWERTRAIN
Charles Jones has worked for AVL Powertrain for the last five years, specifically four years in Hybrid Controls Engineering and one year in Powertrain Systems Engineering including the use of SysML and model-based methods. Prior to joining AVL, Charles was Technical Manager at LuK Leamington, where he specialised in functional design and development for embedded controllers for vehicle automated transmissions and clutches.
Dian Liu
PhD Student, University of Bath
Dian Liu received an MSc degree in automotive engineering from the University of Bath. He currently pursues his full-time PhD in the Powertrain and Vehicle Research Centre (PVRC) with funding from the university and the Chinese Scholarship Council. His work focuses on the control of IPM generators coupled with low-cylinder-count IC engines.

Dr Pratap Rama
Manager, Platform Architecture & Sub-Systems Engineering, Intelligent Energy
Pratap Rama gained his BEng Hons in Aeronautical Engineering in 2003 and his PhD in Polymer Electrolyte Fuel Cells at Loughborough University in 2010. Pratap joined Intelligent Energy in 2010 and has performed the role of Platform Architecture & Sub-Systems Engineering Manager since 2012. His team’s remit covers all major sub-systems as well as control strategy development and system simulation.

Alessandro Renna
CAE Engineer, AVL Powertrain
Alessandro Renna worked as a research fellow at the University of Salento until April 2014, being involved in 1D and CFD engine simulations in order to optimise the charging system of a 2-stroke diesel engine for aircraft applications. Since May 2014, he has been working for AVL Powertrain as a CAE Engineer in the Electronics and Controls Department, involved in automotive simulations, controls and calibration.

Mark Sealy
Engineering Director, Commercial Vehicle Sector
Mark Sealy joined IMI Vision in 2005 as Senior Programme Manager, working on truck emissions technology. He went on to lead Norgren’s advanced engineering team in the introduction of electric actuation for Euro 6. Mark is now Engineering Director for the CV sector, responsible for product strategy, interdivisional programmes, and is also leading a new venture into waste heat recovery solutions for trucks.

Jonathan Seed
Chief Engineer Design & CAE, Ricardo
Jonathan Seed has 18 years of experience in design, development and manufacturing of transmissions and hydraulic systems. Jonathan graduated from the University of Leeds with a BEng (Hons) in Manufacturing Systems Engineering. After university he went to work for AGCO as a Manufacturing Project Engineer and in 2000 was made Senior Design Engineer. In 2007 Jonathan joined Ricardo as Principal Engineer.

Dr Kathryn Taylor
R&D Project Engineer, Romax Technology
Kathryn Taylor is responsible for managing and delivering R&D projects mostly focused on efficiency improvements in automotive drivetrains. Kathryn graduated in Physics from the University of Oxford, and completed a Physics PhD at the University of Nottingham in 2008. She joined Romax in 2010 as a software developer, and has since worked on various software and R&D projects.

Nigel Taylor
Senior Manager Advanced Energy Storage & Consumption, Low-Carbon Vehicles Research, Jaguar Land Rover
Nigel Taylor is a physicist with a passion for engineering and spent 18 years working on vehicle NVH projects, developing a number of measurement processes. Since 2008 Nigel has worked on Low Carbon Vehicles and has been involved in a number of projects including: Limo Green, a range-extended electric Jaguar XJ, the C-X76 concept car, a gas turbine range extender simulation and the development of a very high-performance battery pack. He leads the JLR-WMG-TMETC Energy Storage Catapult and has successfully developed this from the ground up to become a research group. Nigel’s scope has now widened with a senior management role looking after advanced energy storage and energy consumption.

Eur Ing Robert Watson
Chief Engineer, Teva Motors
Robert Watson has a 30-year career in automotive engineering, with particular expertise in designing and developing lithium-ion battery packs for EVs. Robert managed EV projects at THINK Global AS in Oslo, as well as working for Rolls-Royce and Aston Martin Lagonda.

Robert Winstanley
Lead Technical Services Engineer, ANSYS
Robert Winstanley graduated from the University of Sheffield with a Masters in Mechanical Engineering and has spent the last 13 years working extensively with computer-aided engineering and analysis, leading design in a variety of industries from nuclear safety to the energy industry, via automotive powertrain and turbomachinery. Robert is a Chartered Engineer with the Institution of Mechanical Engineers and Lead Technical Services Engineer in the Aerospace, Automotive & Turbomachinery Group at ANSYS UK.

PAYMENT DETAILS

Payment must accompany this registration form. Registration will be confirmed only on receipt of full payment.

PLEASE INDICATE METHOD OF PAYMENT:

□ Cheque Cheques should be made payable to IMechE and crossed. Please note international delegates may pay only by credit card, BACS or banker’s draft. A copy of the draft must accompany this form. It is the delegate’s responsibility to pay any bank charges.

□ Credit Card

Card type: □ Visa □ MasterCard (please note we cannot accept American Express, Diners Club or Maestro)

Card No
Valid From / Expiry Date /

Name of Cardholder
Billing Address of Cardholder (if different from above)

Postcode

Amount to be Deducted
Signature

□ BACS BACS bank transfers can be made to:

IMechE Current Account, NatWest Charing Cross Branch
Sort Code: 60-40-05
Account No: 00817767
IBAN Code: GB96NWKB60400500817767
A copy of the draft must accompany this form.

□ Invoice (UK residents only) Delegates wishing to be invoiced must provide an order number.

If your company does not use order numbers please include a formal request for invoicing on your company’s letterhead. A charge of £10 + VAT will be made to cover additional administration costs. Invoices are payable on receipt and no alterations to these terms will be accepted.

FIVE WAYS TO BOOK

1 Online: www.imeche.org/events/C6188
2 Email: eventenquiries@imeche.org
3 Phone: +44 (0)20 7973 1258
4 Post completed booking form to:

Event Registrations
Institution of Mechanical Engineers
1 Birdcage Walk
London SW1H 9JJ

5 Fax: +44 (0)20 7304 6845

Please read the information listed below as each booking is subject to the Institution’s standard terms and conditions.

CONDITIONS OF BOOKING

Completed application forms should be returned to the address above, along with the correct payment. Attendance at the event will be confirmed on receipt of the full balance. All participants are advised to bring a copy of their confirmation with them on the day, to ensure the fastest possible entry.

SPECIAL REQUIREMENTS

Please inform us of any special requirements, e.g. dietary or access, on the relevant section of this form.

CANCELLATION

For a refund (minus £25 + VAT admin charge), cancellations must be received at least 14 days prior to the event. Replacement delegates are welcome at any time. The Institution reserves the right to cancel any event. In this case, the full fee will be refunded unless a mutually convenient transfer can be arranged. In the event that the Institution postpones an event for any reason and the delegate is unable or unwilling to attend on the rescheduled date, they will receive a full refund of the fee paid.

The Institution is not responsible for any loss or damage as a result of a substitution, alteration or cancellation/postponement of an event. The Institution shall assume no liability whatsoever if this event is cancelled, rescheduled or postponed due to a fortuitous event. Act of God, unforeseen occurrence or any other event that renders performance of this conference impracticable, illegal or impossible. For the purposes of this clause, a fortuitous event shall include, but not be limited to: war, fire, labour strike, extreme weather or other emergency.

Please note that while speakers and topics were confirmed at the time of publishing, circumstances beyond the control of the organisers may necessitate substitutions, alterations or cancellations of the speakers and/or topics. The Institution reserves the right to alter or modify the advertised speakers and/or topics if necessary without any liability to you whatsoever. Any substitutions or alterations will be updated on the event’s webpage as soon as possible.

VENUE

University of Warwick, Coventry CV4 7AL

LIABILITY

The organisers do not accept liability for any injuries or losses of any nature incurred by delegates and/or accompanying persons, nor for loss or damage to their luggage and/or personal belongings.

ENQUIRIES

For event enquiries please call +44 (0)20 7973 1258 or email eventenquiries@imeche.org

The Institution of Mechanical Engineers is a registered charity (no 206882) VAT No GB299930493.
OTHER EVENTS TO LOOK FOR:

10-13 May 2015
Nottingham
VEHICLE THERMAL MANAGEMENT SYSTEMS CONFERENCE AND EXHIBITION (VTMS 12)
VTMS 12 will cover the latest research and technological advances in the field of heat transfer, energy management, thermal comfort and the efficient integration and control of all thermal systems within the vehicle.

JOURNALS
The Journals of the Institution of Mechanical Engineers are published by SAGE. The leading title the Proceedings of the IMechE now comprises sixteen Journals covering a broad range of engineering disciplines. Our journals can be accessed via uk.sagepub.com/imeche_home.sp as well as through Scitopia, and other leading scholarly search services.

To find out more contact Subscriptions on +44 (0)1952 214050 or email subscriptions@imeche.org

MEMBERSHIP
Whether you’re a student, apprentice, graduate, qualified engineer or just have an interest in engineering, Institution membership offers the highest professional prestige. Professional registration is a valuable investment for any engineer who is serious about their career.

Find out which level you’re best suited for at www.imeche.org/membership or email us on membership@imeche.org

GET INVOLVED
Whether you’re new to the profession or well established, volunteering is a great way to gain new skills, knowledge and experience. As an Ambassador you have the chance to represent your profession and give something back to the engineering community as well as inspiring the next generation.

See www.imeche.org/volunteering for more information or go to http://nearyou.imeche.org

Continuous Professional Development (CPD)
Our online Career Developer tool can help you:
• Plan Create an Action Plan and identify targets
• Record Download a record of your learning activities
• Review Reflect on your professional development

Register for Career Developer and get more from your career at www.imeche.org/careerdeveloper

FORWARD THINKING
We are the market leader among professional engineering bodies. We’ve been supporting engineers since 1847 and have 111,000 members in over 140 countries, working in the world’s most dynamic and important industries. Our comprehensive events programme brings you the latest research and best practice from industry and academia.
